Artificial intelligence in the IVF laboratory: no longer the future, but a clinical reality

Referent: Dr. Marcos Meseguer | Vorsitz: Prof. Dr. Jan Krüssel

Join Dr. Marcos Meseguer as he explores how artificial intelligence has moved beyond promise to become a true clinical reality in the IVF laboratory. In this forward-looking lecture, he will highlight how AI-driven tools are already transforming embryo assessment, laboratory workflows, and decision-making in reproductive medicine. Drawing on his extensive experience in embryology research and innovation, Dr. Meseguer will provide valuable insights into the opportunities, current applications, and future direction of AI in IVF practice.
